"The story of the settlement of the plains is one of adaptation to environment. When the settler passed beyond the line of forests he began to build his house of other materials than wood. How the sod house was constructed, how life was lived under these conditions, how women and children fared, how they dressed, how they amused themselves, how education was provided, all of this is of broad human interest." The Donner party was a group of California emigrants who, in the winter of 1846-47, were caught by storms in the mountains on their way west. Many of them perished; some lived only by cannibalism; all passed thru terrible hardships. "This account is intended for a full and critical history of that ill-fated band of pioneers, and has been made possible by the remarkable preservation of detailed records. It is strictly factual." Preface

"As Mr. Stewart tells the tale, it comes to life in horror and tragedy. He writes swiftly, surely, dramatically, and with impartial accuracy. Almost every member of the party is recreated with skill and sympathy. His book is grand—if you have the stomach for the story." Sat. rev. of lit.

The independent countries are arranged alphabetically in the first section of the volume; the possessions of foreign powers are given in the second. Each chapter is furnished with an outline map, list of important dates, and references for further reading." Book rev. digest

"Travelers to Central and South America will be glad to tuck the volume into their bags, for it gives them the background of information in brief and very readable form that tourists like for their sightseeing. It will make excellent collateral reading for schools. . . The general reader will find in it much of the kind of things about Latin America that general readers always like to know about strange countries put into that brief space essential for most of them."
